a fun lite napoleonic game - its much like the Hexwar strategy games, but this one is better i find in that the animations are more pleasant and i think there are more possibilities for how to win than in the hexwar games. The game mechanics of course are more like panzer corps than SSI's Battles of Napoleon, - the most irksome is probably that only one unit can occupy a square, even though a square itself can be quite large on the battlefield - so its some level of abstraction one must expect with a game like this. I recommend this one nevertheless for those who like all things napoleonic and dont mind it when the game is at best bearing a napoleonic flavour rather than being historically accurate.. Really nice to have a good turn based strategy set in the era. I am really enjoying it so far.. A ok game with alot of content.. A ok game with alot of content.. Really nice to have a good turn based strategy set in the era. I am really enjoying it so far.. shockingly poor historically and game mechanisms about as realistic as drughts or chequers would be. So sad, this game is childs play with a small map genaric units and absolutly no real campaign. its a bunch of unrelated battles that can be played individually. dont get this its a wast of your money even on sale. if you want a puzzle game, which this is go get yourself a rubix cube and have more variation. why bother to name the units when they are all exactly the same? i dont even mean there are diffrent types of infintry, or that each nations is the diffrent they all have the same factors except for some generic bonuses you give at the begainig of every battle to any random unit you want to, and there not earned there a set amount. a little more effort and this could have been a good game, but no thanks again for a half /// product that looks like somebody got board designing it half way through. unless you want a puzzle game dressed up in era uniforms closer to paper rock scisors then a real war game. if thats what you want have fun..
