*In an open field beside a meadow  
of warm flowers, sibling cubs played  
a game of 'Tag the big bad wolf.'*

What if the wolf ate me? And the bear.  
Imagine if I slipped and fell into the river?  
She worryingly wailed to her mother at times.  
Don't be afraid of the dangers of the world  
dear, mother Lo usually calmly responded.  
Otherwise the lonesome fog could get you.  
It comes for all with fear in their hearts.

A brief disclaimer: I'm yet to play any of the Shelter games, so I'll refrain from making reference to them beyond this point...other than to say that this product has a wee advertisement for Shelter 2 at its climax, and should therefore have contemplated giving itself away for free. Five dollars is certainly a tad excessive for what you're getting here. On with the review, then.

An absolute aural and visual delight, The Lonesome Fog is nonetheless a product of interest only to those who don't mind that it "isn't a game", is insanely short, and is firmly aimed at *kids*. It also "boasts" a click-and-drag feature that, to the best of my perception, didn't add much to the experience other than allowing the viewer to appreciate the images from a slightly changing perspective. If you wanted to, you could just as easily limit your interactions to clicking the arrow leading to the next "page", and you honestly wouldn't be missing much. The image-dragging mechanic is a cute novelty, but that's about it.

*Might and Delight* describe this as "a living book", and that's a fair enough description I suppose. So for the love of all that's warm-hearted in the world, please just move on if you're the type who whines incessantly about what should or shouldn't be sold on Steam, or you're someone who expects more than ten minutes' entertainment for five bucks. I mean, even I'll concede that I'm not sure what the devs were thinking when they slapped on this product's price-tag, but come on: be a smart consumer, know what you're buying, and don't expect the entire marketplace to revolve solely around you. Different strokes for different folks.

An easy recommend for parents of young children and/or those who allow themselves to be young-at-heart, at least upon occasion. I wouldn't go paying more than a couple of bucks for it, though, no matter who you are.

Verdict: 7.5/10.
